

TECHNICAL DATA SHEET

SECUMAX PLASTICUT NO. 3469

Safety technology

Concealed blade – a maximum degree of safety

The SECUMAX PLASTICUT is a disposable cutter. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

RETROFIT DISPOSABLE SAFETY KNIFE WITH CONCEALED BLADE, ESPECIALLY FOR CUTTING FOIL AND PAPER.

Order No. 3469.08

Doesn't rest. Doesn't rust.

The SECUMAX PLASTICUT is different from the other products in our range but only in the detail. But you know: that's what often matters most. This flexible disposable cutter is best used for thin film and paper. Due to its width of just 2.5 mm, cutting protective film stretched over a thin gully as between door and pillar on a new car is also possible. The blade is made of stainless steel, the cutting edge is TiN coated. And: the SECUMAX PLASTICUT is perforated - in case you want to add additional fittings later on.

No blade change

The SECUMAX PLASTICUT is a disposable cutter. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

Nose for piercing

You will not put away the SECUMAX PLASTICUT so easily. That's because it is comfortable, light and handy. It has a

slightly raised and pointed nose and is therefore ideal for piercing into the material to be cut.

Stainless steel blade

Not all film cutters are fitted with a stainless steel blade. The SECUMAX PLASTICUT is an exception. What's more: even its cutting edge is TiN coated. Both increase the value and durability of your cutting tool.

Protected goods.

The quality blade is safely embedded between the nose and the handle. So it only cuts what you really want to cut. And there is no risk to your goods while doing so.

To protect your fingers

The perforation in the handle has a very specific purpose: You can attach an additional finger protection bracket here. The hand that is cutting will then be able to grip better. Better safe than sorry.

SECURITY ADVICE

To ensure that you use your new MARTOR knife safely and most effectively, please read and note the following user-instructions. Please keep the written guide in a safe place so that you can access it at any time.

1. Usage advice: Please use the product carefully for described work only and not for any purposes other than those that are intended. Please take the correct handling and the proper use of the cutting tool into account in this regard.

2. Special application Instructions to avoid the danger of injuries: Only use cutting tools that are in perfect condition and have sharp, clean and undamaged blades. Employ the utmost care when handling the knives. CAUTION: The blade is sharp and can result in serious and deep cuts. Therefore, never reach into the blade! To reduce the danger of injuries, hold the hand that is being used to restrain and stabilise the cutting base in such a manner that the restraining hand or even other body parts are not endangered in the event that the knife slips. Do not modify this product in any way. Modifi-

cations of any kind may impair product safety. CAUTION: The risk of injury caused by manipulation of this product is extremely high. When both cutting edges are no longer sharp, dispose of the knife as general waste.

3. Non-use of the knife: Store the knife in a secure place.

4. Care instructions: Always keep the knife clean and do not expose it to unnecessary humidity to safeguard a long service life.

CAUTION: No liability will be assumed for consequential losses. Subject to technical changes and errors! This knife does not belong in the hands of children!

ACCESSORIES

MATADOR

NO. 104000

Our small paper and film cutters are so handy they will delight you. But to further increase your cutting comfort, you can attach an ergonomically shaped additional handle. No tools are needed for attaching and detaching. The clasp function of the MATADOR is designed to perfectly fit your cutting tool. Stay safe, increase stability.

SAFETY FINGER-CATCH

NO. 103000

Have you noticed the small holes in the middle body of the SECUMAX PLASTICUT and the SECUMAX CARDYCUT? The FINGER PROTECTION BRACKET fits exactly into these holes. Minimise the risk of your hand slipping whilst cutting and coming close to either the blade or the cutting material. Order it, fit it, and cut with confidence!

Value Driven Safety
