# SECUNORM HANDY

## NO. 444

Original size

### 4-cutting edge blade

Why do you benefit more from your blade? Because it has four sharp cutting edges. By turning and turning it over, you quadruple the usage time - and always cut again like new.

### Slider on both sides

With the right hand? With the left hand? It's all the same here. Because we have fitted the SECUNORM HANDY with a slider that is accessible from both sides. So, anyone can really work with it!

### Stainless steel

Yes, you are right, it's a power package. Because the plastic insert of is inside a stainless steel handle. Your cutting tool is glad to go "through thick and thin" with you for a little longer.

### Handy format

The SECUNORM HANDY can slip into every pocket. For times when it's not in use. When in use, you will appreciate its lightness and size. Ribbing on the slider is a grippybonus.

### Without tools

Changing blades is so easy. You do not need a tool. Pull the plastic insert out of the handle at the back, turn or change the blade, put everything back and there you have it!

## Small and handy. With a stainless steel body.

Do not be fooled by how compact the SECUNORM HANDY is. Being handy, doesn't mean it's cute, on the contrary: It is a cutting tool with "bite" and all the qualities required, even for a moist work environment. You can use the stainless steel handle and the blade for a particularly long time. As it is both lightweight and handy it is suitable for many cutting applications even high frequency cutting.

### Application

### Safety technology

#### Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM HANDY guarantees a very high degree of safety from cut injuries. As soon as you've started the cut remove your thumb from the slider. The blade will then withdraw back into the handle immediately after leaving the material being cut.
