SECUNORM PROFI

NO. 07152

Original size

Ergonomic handle.

Why the SECUNORM PROFI has been so popular for as long as we know? Because, for one, it sits comfortably and valuably in your hand. You can thus complete even demanding cutting work without any fatigue.

Hard to take up

The plastic insert of the SECUNORM PROFI is inside an aluminium handle. The stable design makes it ideal for high cutting frequencies and a long life.

2-cutting edge blade

Before you have to change the quality blade, you can turn it over once. This doubles the usage time of the blade - and reduces your energy consumption. Because your product will cut again like new.

Without tools.

You can kiss goodbye to complex blade changes. In the truest sense of the word. You only have to push the plastic insert out of the handle and exchange the old blade for a new one.

Safe fit

A SECUNORM PROFI will not let you down. But it can be hung down! Just pull the strap through the eyelet and let the cutting tool hang from your wrist or belt loop.

A classic. For right handed users.

Do you sometimes wonder why we've never bothered to update our SECUNORM PROFI? It is, after all four decades old! Well to be honest, it has never been necessary. Yesterday's pioneer is today's classic. A timeless shape, a robust form, a versatile ability: what more could you want? The „forefather“ of all of our TÜV-tested safety cutters, the SECUNORM PROFI features automatic blade retraction and has therewith protected generations of users.

PRODUCT FEATURES

Technical features

| | | | |
|--|-------------------------|---|------------------------------------|

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM PROFI guarantees a high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. The blade can thus withdraw back into the handle immediately after leaving the material being cut.

THE PERFECT FIT FOR ALL. DOES THE PERFECT JOB.

SECUNORM PROFI

- › For high cutting frequencies
- › Ergonomically shaped handle
- › Very abrasion proof thanks to the aluminium
- › Automatic blade retraction
- › TÜV-certified
