SECUMAX 320 MDP
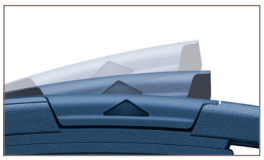
NO. 32000771

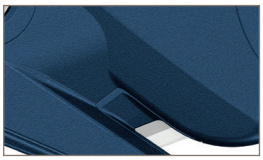
Metal-detectable plastic
The SECUMAX 320 MDP is metal detectable and especially suited to companies and sectors processing sensitive materials. Even the tiniest fragment of the knife can be traced before any contamination of your products takes place.

Safety first
The concealed blade and rounded nose reliably protects you and your products. Furthermore, the knife head has been significantly strengthened making it more robust and longer lasting.



Blade change made easy
Another handling and safety benefit is the newly designed blade change. Simply lift up at the blade change button and remove the cover. You can then directly access the 4-cutting edge blade.

Perfect ergonomics
Can you feel the difference? The new handle shape with the finger friendly contours fits like a glove. The preset cutting angle is also kind to the hand and arm helping you to position the knife for cutting.



Optimised blade section
Just two examples: The cutting channel is formed so that your safety knife moves away the freshly cut material even faster. Diagonal cuts are also easier than ever to perform. Your benefits: Less effort required for the task.

COMBI reloaded. The new generation. Metal detectable.

The SECUMAX COMBI MDP was always in a class of its own as a film cutting expert – until it found its legitimate successor. The new SECUMAX 320 MDP makes an instant impression with its outstanding design. And if you look more closely, you will appreciate its inner values. For example, in comparison to its predecessor, the perfected ergonomics and the completely overhauled blade change. What about the subject of „metal detectability"? It has always been in the COMBI MDP's DNA – and so it will remain that way.

PRODUCT FEATURES

Technical features

- Maximum safety
- Metal detectable
- Safer blade change (with magnet)
- Abrasion resistant
