

TECHNICAL SHEET

SALVADOR STANDARD

The Agmov family of lifeline poles was developed to prevent operators from exposing their hands at the point of impact. The standard model features a polyester eyelet and a bungee cord that tightens the piece, allowing for the attachment of a wide variety of tools, such as chisels, impact wrenches, open-end wrenches, and more.

Hands away from the impact site.

TECHNICAL SHEET

SALVADOR STANDARD

COMPOSITION

- Made of PP
- PVC rubber handle
- PU-based paint in yellow.
- Ball-end fitting

NCM 3926.90.90
