

MARTOR PRESENTATION FOLDER

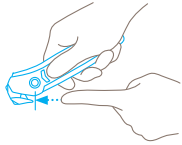

NO. 900852

PRODUCT OVERVIEW

Safety technologies

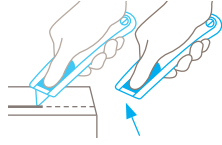

SECUMAX Concealed blade

The blade is not open, rather concealed, shielded from both people and goods alike. Giving you a maximum degree of safety from cut injuries whilst cleverly protecting your goods.

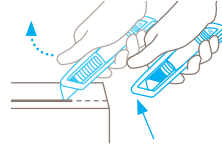

SECUPRO Fully automatic blade retraction

The intelligent cutting tool: as soon as the blade leaves the cutting material, it with-draws automatically into the handle – without your having to do anything. That's what we call "a very high degree of safety".

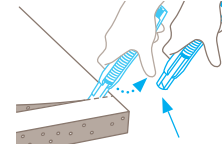

SECUNORM Automatic blade retraction

Thumbs up for a high degree of safety. As soon as you start cutting, let go of the slider. The blade will disappear into the handle the moment it loses contact with the material being cut.

SECUBASE Blade retraction and locking

The automatic blade retraction protects you from cutting injuries. This requires that you remove your thumb from the slider after piercing the cutting material. Alternatively, you can also lock the slider and the blade. When you release the lock, the blade retracts.
