SECUPLUS RIPPEX 220

NO. 220001

70% of the original size

Bladeless

The SECUPLUS RIPPEX 210 made of plastic works without a blade. There is no sharp cutting edge on which you could injure yourself. This special protection considerably increases your safety at work.

Bevelled edge

The edge on the top is shaped exactly so that you can use it to rip paper layers. Condition: The paper is under tension. The straight knife nose paves the way into the roll.

Smooth contact surface

The underside of the SECUPLUS RIPPEX 220 is completely smooth and straight. So you don't lose speed in the roll. You can glide through comfortably – while the splitting work is done further up.

Ergonomic handle

You move the paper splitter forward by pushing. It is very pleasant that the rear part of the tool is rounded. This avoids pressure points and other discomfort.

Recess and opening

Ergonomics are further enhanced by fingers and thumb all having their own place. The thumb sits comfortably in the recess on the handle's top, while the fingers find a secure grip in the handle's opening.

Paper splitting without a blade – even in multiple layers.

The SECUPLUS RIPPEX 220 is ideal for processing roll material. Thanks to the stable edge on the top, it is able to split single or multiple layers of paper from the roll. Since there is no blade, cutting injuries are impossible. And material shrinkage is also kept within limits. Because the ergonomic SECUPLUS RIPPEX 220 can not only be inserted precisely into the selected layer. It also glides over the surface without leaving any marks.
