

# SAFETY POSTER INSTRUCTIONS FOR THE SAFE HANDLING OF YOUR CUTTING TOOL

**martor**

## SECUMAX 350

### USAGE

For the best possible grip, place your thumb on the **three ribs**. The soft-grip further limits the possibility of slipping.

Use the nose of the cutter to **pierce** the cutting material. **Do not lever** against staples, nor force the nose into edge protectors!

Hold the cutter at a **slight angle** when cutting through cardboard boxes.

For best results, cut plastic strapping band **diagonally** (at a 45° angle).

### BLADE CHANGE

Swing open the **blade magazine**. The fitted blade head will automatically disengage.

Remove the fitted blade from the head of the cutter. Now you can either **rotate or replace** the blade.

Position the spare blade **parallel** to the slanted side of the cutter head. Push the blade in, and then **downwards**, until fully engaged.

Push the blade magazine **back into the handle** to lock the blade head in place.

### PROTECTION OF USER

The concealed blade provides a maximum degree of **protection from cut injuries**.

### PROTECTION OF GOODS

The concealed blade **will not get into contact with your goods** either.

### DISPOSAL

Dispose of the **used blade head** in either your **USED BLADE CONTAINER...**

...or directly via your **general waste**.
