SECUMAX POLYCUT MDP

NO. 08500772

Metal detectable

A cutting tool, or parts of it, can get lost while working. But only for a short while. Thanks to its ability to be detected by a metal detector you can find it again, before it leaves the company with your goods.

It's all protected

The stainless steel quality blade is safely embedded between the nose and the handle. So it only cuts what you really want to cut. And there is no risk to your goods while doing so.

Singularly good

The SECUMAX POLYCUT MDP is a disposable safety knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

Long, pointed nose

Why the extra long and pointed nose in the SECUMAX POLYCUT MDP? Because you can place it particularly well in the spaces in between. The cutting material is also led to the blade in a much more reliable way.

Ideally placed

You won't misplace the SECUMAX POLYCUT MDP so easily. The safety knife is equipped with an eyelet so it can be kept in an easy to find place.

The all-rounder among specialists. Metal detectable.

The SECUMAX POLYCUT MDP is another of our small, plastic disposable knives and is special by being an all-rounder. The larger gap between the blade and plastic means it can cut through multiple layers of material. Furthermore, with its long pointed nose you are able to cut through paper film, etc. Your company will be especially pleased that it is also made of plastic that can be traced by a metal detector and can therefore be found again.

PRODUCT FEATURES

Technical features

Maximum safety

Metal detectable

Disposable knife

Ergonomic

Cutting depth

For right and left handers

Lanyard hole

Main cutting materials

Wrapping, stretch and shrink foil

Tape

Layers of foil or paper
