SECUMAX TRENEX

NO. 06200012

Original size

Double protection

You will only cut what you really want to cut with the moulded-in blade. That means neither yourself nor anything coming under the area of „cutting material.“

Rounded off nose

The long rounded nose compresses the material to be cut and guides it safely through to the blade. This avoids snagging and, more importantly, cutting yourself.

Singularly good

The SECUMAX TRENEX is a disposable knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

For any hand

The SECUMAX TRENEX is small, light and handy. So handy that you can gladly work longer with it. It doesn't matter whether you are right or left-handed, because this cutting tool always fits.

Ideally placed

You won't misplace the SECUMAX TRENEX so easily. The safety knife is equipped with an eyelet so it can be kept in an easy to find place.

Slices anything that's soft.

The SECUMAX TRENNEX is a disposable knife made of a stable plastic. It'll efficiently cut an array of different materials, but does prefer to work with those of a softer substance. Foam, pipe insulations, perforated film and coarsely meshed textiles are all materials the SECUMAX TRENNEX loves to cut. The tip of its nose is significantly rounded. This prevents hooking and tripping. Minor detail, major effect.

PRODUCT FEATURES

Technical features

Maximum safety

Disposable knife
