SECUPRO MAXISAFE

NO. 101306

Original size

Ergonomic handle

The plastic handle now sits even better in the hand thanks mainly to the new shape of the knife's back. The slider and blade change button have also been improved for efficient operation.

3-sided slider

From the right? From the left? From above? Regardless of how you want to activate the blade, all options are available with the SECUPRO MAXISAFE. What's more, the 3-sided slider is now grooved for better grip.

At the press of a button

Your two hands alone are enough to change the blade. And these short instructions: press the blade change button and swing open the handle. Push the blade carrier to the front and you can change the blade. It's that easy.

Metal guard

SECUPRO MAXISAFE is not afraid of a little friction. A metal abrasion protection shield, found on the underside of the knife head, works to prevent any general wear and tear as you cut your path through the day.

2-cutting edge blade

Don't change your blade the moment the tip turns blunt. Double the usage time of your blades and minimize wastage by always remembering to flip them over. Don't forget: there are two sides to every blade!

Perfect handling – from every side. With ceramic blade.

The SECUPRO MAXISAFE has been making an impression for more than 15 years due to its lightness and wide range of applications. The safety knife has now reached new levels of ergonomic design. Just hold the 3-sided slider in your hand and try it out ... notice the difference? Another new feature is the pre-installed ceramic blade. The fully automatic blade retraction system ensures that the blade always retracts securely back into the handle.

PRODUCT FEATURES

Application

Safety technology

Fully automatic blade retraction – a very high degree of safety

The fully automatic blade retraction of the SECUPRO MAXISAFE guarantees a very high degree of safety from cut injuries. The blade withdraws into the handle immediately after leaving the material being cut. Even if the slider is still being activated.

THE PERFECT FIT FOR ALL. DOES THE PERFECT JOB.

SECUPRO MAXISAFE

- › With 3-sided slider
- › Fully automatic blade retraction
- › With ceramic blade
- › Metal abrasion protection shield
- › GS-certified for approved safety
